

Janki Devi Memorial College
ACTION TAKEN REPORT
STUDENTS' FEEDBACK 2020-21

The college took two student surveys to get their feedback during the session 2020-21:

1. Student Feedback Form
2. Student Satisfaction Survey

IQAC compiled the suggestions/ comments from students, that along with graphical/pictorial representation of the feedback results was shared with all faculty.

STUDENTS' OBSERVATIONS/ COMMENTS/ SUGGESTIONS
(COMPILED BY IQAC)

Several students **expressed their appreciation of the efforts made by the teachers.**

Some comments are attached here:

"Teachers teach very well and in such a way that even though we sit at home due to the Covid-19 pandemic yet all concepts along with their real-life application are clear."

"Our teachers also ensure our mental well-being by motivating us in these unprecedented times."

"Good efforts by all teachers. Good learning environment. Regular assignments for better understanding."

"I think our institution tried to used more and more techniques to improve education qualities better".

"Happy with the efforts made by teachers. As A Student. We also Know Teaching Online is a sudden and Big Challenge For our teachers."

"No need of improvement. Our teachers always give their best to teach us."

"All teachers took utmost care of the students, so i have no suggestions. I have only gratitude towards professors and principal for always encouraging us and help us in any way any situation."

"The teachers are really very sweet and friendly. Hope, this continues in the future."

Several students gave their observations related to online mode:

- Timetables could be made little short and relaxing for better concentration.
- Very tiring schedule like sometimes we have class from 9 to 3.30 and it is very difficult to sit continuously in front of screen for such a long time
- It's stressful sometimes
- Teacher give their best but sometimes the network issues increase
- College must be open if covid problems became less
- Give extra classes for those students who are facing problems like internet issue or family problems.
- Any change and effort can't make online studies as fruitful as offline...we are facing a lot issues in understanding.
- During our online classes, the network issues is almost there whenever teachers take our classes through college.

STUDENTS' Observations/ Comments/ Suggestions towards Pedagogy

- Teachers should be well prepared
- Make learning interesting
- Use innovative methods
 - Share Screen, use PPTs, show videos,
 - White board
 - Use better graphics and visual media
 - Inculcation of experiential learning; illustration of texts or concepts.
 - Example based learning
 - screening of movies
 - Projects can be given
 - Creative activities
- More engagement/ conversation with students/ Interactive. Communicative classes will be better than long monologs
- Try to reach every student and ask for their doubts.
- Teachers should be able to identify students' weaknesses and strength. And also be able to support students.
- Need for a strategic approach while teaching the students. Both good and weak students are mixed up in the same class. Sometimes weak students find it hard to cope up to the level of excellent students. Teachers should understand the students' level and understanding ability . All the students are different and not all understand with same pace. So steps to be taken for students of varied abilities to understand so that both the weak and good students can progress in their own way.
- Big topic to be broken into small sections
- Only one teacher should be assigned for one subject as multiple teachers for single subject creates confusion among students.
- IF POSSIBLE, TEACHERS SHOULD POST THEIR RECORDED LECTURES ON CLASSROOM.
- Prepare before class. Make learning interesting.
- Improve communication skills
- Make aware students about current issues, continuous class debates or discussions on the particular topic which is going on are also effective to make learning more interesting and it also help students to enhance their learning/thinking eligibility.
- Give self-made notes, if possible/ extra support material
- Topics should be revised after the syllabus is completely. There should be a doubt class so as to give every topic a closure.
- Teachers should take both presentation and assignments.
- Handing over the study material and syllabus beforehand is more beneficial.
- Punctuality
- Answer to the queries of students without discouraging and embarrassing them
- Bilingual
- All students to participate in activities/ discussion
- Cameras to be ON for teacher and students
- Guide on how to write answers, on how to proceed with exams in a more detailed way
- Sometimes lot of time passed in attendance.
- Teachers should take class on time as per their schedule
- Assignments-
 - Some students have preferred Less assignments
 - Some request for weekly assignments
 - Should discuss assignments in class ,
 - fair grading system that makes it easier for their students to get into a Masters program, purely on the basis of merit.
 - Remarks to be mentioned on assignments

Other aspects related to faculty

- There should be mental health seminars dedicated to the betterment of professors as well.
- The redressal mechanism should allow students to present critical opinions more openly and fearlessly.
- All teachers should be evaluated on a regular basis
- Sometimes interactive meetings must be held with teachers.
- Teachers should motivate students as students are very exhausted of online classes, sometimes they should mentor the students,etc

Related to opportunities in the college

- 1) Extra career guiding sessions with teachers
- 2) Sometime Library's books are not in a good condition.
- 3) Developing one's skills
- 4) International Summer school exposure
- 5) More courses could be included.
- 6) Internships
- 7) Better website
- 8) More access to computers
