Department/ Society of the Resource Person: Noida Deaf Society
No. of Hours contributed by the Resource Person: 1.5 hours each session

Learning Outcomes of the course:

A sign language course aims to develop students' proficiency in both receptive and expressive skills necessary for effective communication with Deaf and hard-of-hearing individuals. Students will learn to use basic vocabulary, grammatical structures, and non-manual signals to construct simple sentences and engage in everyday conversations. The course also emphasizes fingerspelling, numbering, and the use of facial expressions and body language to convey meaning. Additionally, students will gain cultural competency by exploring the history, values, and social norms of Deaf culture, understanding the various causes and implications of hearing loss, and appreciating the role of sign language in the Deaf community. Through practical application and engagement with native signers, students will enhance their conversational skills and build meaningful connections within the Deaf community.

Course Modules:

The course consists of 8 modules. This Course on Indian Sign Language (ISL) introduces students to the essential aspects of the language, focusing on fundamental vocabulary, grammar, and cultural context. It covers common greetings, everyday words, family terms, and numbers, along with the ISL fingerspelling alphabet. Students learn to construct simple sentences, understand the importance of non-manual signals like facial expressions and body language, and practice engaging in basic conversations on routine topics. The module also emphasizes developing receptive skills through video materials and interactive activities, while fostering cultural awareness by exploring the history, values, and social norms of the Deaf community in India. Practical application through interactions with native signers and participation in Deaf community events enhances the learning experience, ensuring students gain a comprehensive understanding of ISL and its cultural significance.
