### **Brief Report**

The pedagogy talk was focused on comparative politics as a discipline. He elaborated on how the trajectory of discipline has changed over time, from understanding constitutions of different countries to analysing the domestic changes that led to substantial reforms like Perestroika in erstwhile USSR. He also elaborated on the availability of reading texts and similarity in the literature across countries and also the shortcomings of literature on studying China. The structural aspect of this paper has evolved from Eurocentrism to categorically looking at a comparative study among nations. However, certain topics like political culture, modernisation and development have been constant area of study.

The study needs to evolve by bringing in more localised study of domestic aspects in comparative studies. He also highlighted the classic works on studying comparative politics. It was an enriching session for faculties.

### **Brief Report:**

The session held at the Seminar Room of Janki Devi Memorial College on October 24,2024, commenced at 10 AM. With over 35 students participating, the event began with the encouragement of women in the Workplace. This session emphasizes that Women are excelling in various fields today, particularly in education, where they emphasize personal growth, communication, and liberal arts. Despite their academic achievements, they face challenges in the workforce, such as being less likely to apply for jobs unless they meet all qualifications and being less inclined to negotiate salaries compared to men. However, learning management, marketing, and financial skills have become crucial for professional growth. The evolving nature of education highlights the need for practical skills, like data analysis, over outdated knowledge, as exam scores alone do not define an individual's potential.
