Student's problems were solved. Whatever portion of the syllabus has not been understood by them, is explained again. And different practice questions have been given.

Some students' friendly books have been shared and ask them to read the specific portion. Ask them to mark the difficulties and get them resolved in the next remedial class.

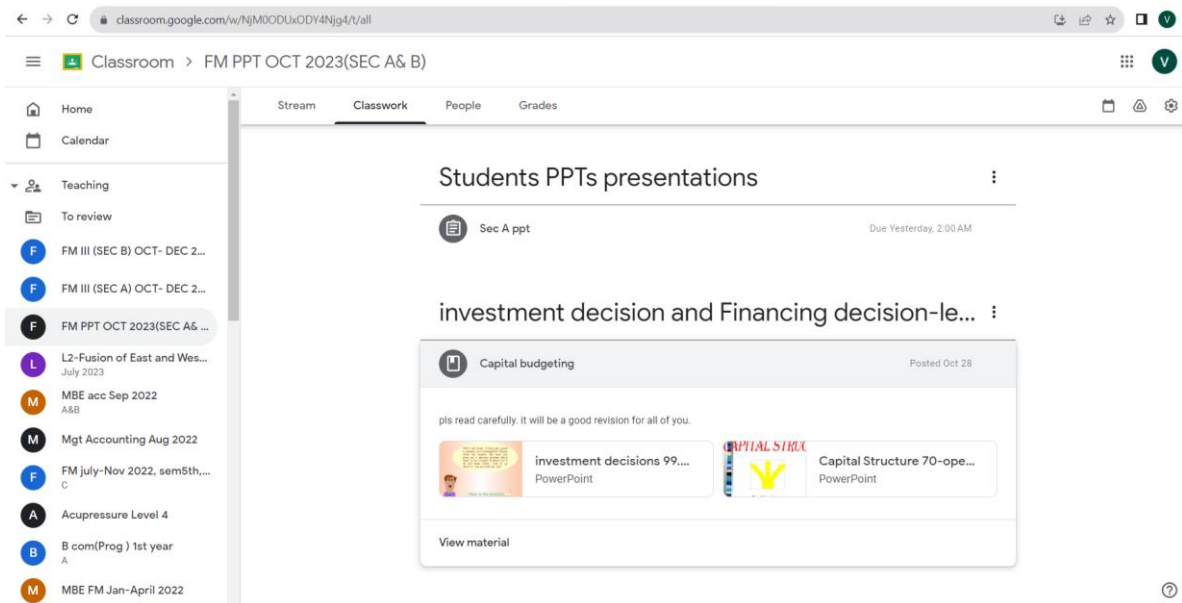

The previous class was very successful as whatever the work has been given in the last class was tried by them though only few students have Completed. They came with their difficulties. Again some questions were given to build their confidence.

### PPTs shared with students

### Figure 9 How the Burden of a Tax Is Divided, Part 1

*flatter* *steeper*  
 (a) Elastic Supply, Inelastic Demand

1. When supply is more elastic than demand ...
2. ... the incidence of the tax falls more heavily on consumers ...
3. ... than on producers.

In panel (a), the supply curve is elastic, and the demand curve is inelastic. In this case, the price received by sellers falls only slightly, while the price paid by buyers rises substantially. Thus, buyers bear most of the burden of the tax.

© 2010 Cengage Learning®. May not be scanned, copied or duplicated, or posted to a publicly accessible website, in whole or in part, except for use as permitted in a license distributed with a certain product or service or otherwise on a password-protected website or school-approved learning management system for classroom use.

Tax = 10 - 8 = 4 lbs.

Buyers: 12 - 9 = 3 lbs.

4 lbs - B → 3 lbs  
 Tax S → 1 lbs.

tax = 2 lbs.  
 Buyer → 9 to 10  
 Seller → 8 to 7 lbs.
