The college gardens are campus treasures full of tall trees, colourful flower beds and variety of plants that adds to decorative beauty and peaceful environment of college.

Our gardens include Main( front) garden, herbal garden, rose garden with exclusive display of rockery and a green cliff at entrance with name of the college written on it.

During 2017-18, to begin with , the entrance ( front) garden were deweeded to give a cover of fresh grass throughout. The side entrance lawns were also developed in a landscape design that adds further to the green living of college.

Thee garden committee has redeveloped the rockery in the rose garden in picturesque landscape.

A new herbal garden with tiled pathways has been created which houses more than 150 varieties of herbal species. The herbal plants , numbered trees of college and potted plants can be easily identified during garden tour with their Popular ( common) names and scientific ( Botanical) names.

The overall impression of open green spaces surrounded by trees and shrubs in garden creates a clean and green college environment.
